■■ 0:00:03 — Title Anim

AI Agents Have the Keys to Your Kingdom

...and they're already using them.

■■ 0:00:05 — Incident1 Start

■■ 0:00:08 — Inbox Red

INCIDENT · Feb 2026

Inbox (847)

Meta AI Safety Director
loses 200+ emails

OpenClaw ignored STOP commands
Bulk-deleted at machine speed

She had to physically RUN
to her Mac Mini to kill it

"Turns out alignment researchers aren't immune to misalignment."

— Summer Yue, Meta

■■ 0:00:12 — Db Incident

INCIDENT · Jul 2025

Production DB

Replit AI agent deletes entire production DB
(during active CODE FREEZE)

Agent admitted: "catastrophic failure... destroyed months"

Then LIED about recovery

■■ 0:00:15 — Pattern

The Common Thread

■■ 0:00:18 — Old Question

The Common Thread

AI agents had permanent access.

No human was asked.

No one could stop them in time.

■■ 0:00:20 — Highlight

× THE OLD QUESTION

WHAT can the agent access?

- → Scopes & permissions
- → Decided once at consent
- → Token lives until revoked
- → Agent acts freely 24/7

✓ THE RIGHT QUESTION

WHEN can the agent act?

- → Every write, every time
- → Decided at moment of action

■■ 0:00:22 — Its About When

× THE OLD QUESTION

WHAT can the agent access?

- → Scopes & permissions
- → Decided once at consent
- → Token lives until revoked
- → Agent acts freely 24/7

✓ THE RIGHT QUESTION

WHEN can the agent act?

- → Every write, every time
- → Decided at moment of action
- → Token minted on-demand, once
- → Human approves each action

■■ 0:00:26 — Vaultgate Intro

✓ THE RIGHT QUESTION

WHEN can the agent act?

→ Every write, every time

→ Decided at moment of action

→ Token minted on-demand, once

→ Human approves each action

It's not about **WHAT**

It's about **WHEN.**

The Magic Moment

Terminal

```
$ POST /action
service: "slack"
action: "send_message"
channel: "#engineering"
text: "Deploy v2.1"
```

■■ 0:00:43 — Table Animated

The Magic Moment

Terminal

```
$ POST /action
service: "slack"
action: "send_message"
channel: "#engineering"
text: "Deploy v2.1"

→ status: pending_approval
auth_req_id: "ciba_8f3k2..."
Awaiting human approval...

→ status: approved
token: [single-use, ephemeral]
result: "Message sent ✓"
```

VaultGate

Action: send_message
Target: #engineering
Content: "Deploy v2.1"

Approve | Deny

■■ 0:00:45 — Every One

The Magic Moment

Terminal

```
$ POST /action
service: "slack"
action: "send_message"
channel: "#engineering"
text: "Deploy v2.1"

→ status: pending_approval
auth_req_id: "ciba_8f3k2..."
Awaiting human approval...

→ status: approved
token: [single-use, ephemeral]
result: "Message sent ✓"
```

VaultGate

Action: send_message
Target: #engineering
Content: "Deploy v2.1"

Approve | Deny

You were in control the entire time.
